Workplace Vision

Aspiring to develop efficient and intelligent systems by leveraging my knowledge in computer science and engineering. Passionate about problem-solving optimization and cutting-edge technology. Innovating and creating meaningful impact. Seeking opportunities to incorporate or innovate and create a meaningful impact

Soft Skills

- Leadership
- Communication
- Adaptability
- Problem Solving
- Time Management
- Teamwork

Education

- Bachelor of Engineering in Computer Science and Engineering
M. Kumarasamy College of Engineering | 2023 – 2027
CGPA: 8.05 (Till 5th Semester).
- Completed 12th grade (2022-2023) with a score of 92% at Bharani Park Matriculation Higher Secondary School.
- Completed 10th grade in the academic year 2020-2021 at Bharani Park Matric Higher Secondary School

Virtual internship

- Full Stack Development Intern
IAT Technologies | 1Month
Completed a one-month online internship in Full Stack Development. Worked with web technologies such as HTML, CSS, JavaScript, and database integration.

Technical Qualifications

- Acquired foundational programming skills through the completion of the Python Basics course on Coursera. Achieved in a minimum of 3 months
- By completing the Object-Oriented Programming course in Java on Coursera, developed expertise in object-oriented design and Java programming.
- Enhanced data analysis capabilities by completing the Python course on Coursera focusing on key libraries and tools in data science.

Hands-on Experience

- **Hostel Management System**
Developed a web-based system to manage hostel student records, room allocation, and fee details. Helps administrators track and organize hostel operations efficiently.
Technologies: HTML, CSS, JavaScript, MySQL
Duration: 3-6 Months
- **HemoScanAI**
Developed an AI-based application to assist in analyzing blood-related data for medical insights. The system helps improve accuracy and efficiency in preliminary diagnosis.
Technologies: Python, Machine Learning, HTML, CSS
Duration: 3-6 Months
- **Event Management System**
Built a platform to organize and manage events, including event registration, scheduling, and participant tracking. Simplifies event coordination for organizers.
Technologies: HTML, CSS, JavaScript, MySQL
Duration: 3-4 Months

Technical Skills

Programming Languages:

- JavaScript
- Python
- PHP
- Java

Web Technologies:

- HTML
- CSS
- Bootstrap

Database:

- MySQL

Tools & Platforms:

- Git
- GitHub
- VS Code
- XAMPP

Area of Interest

- UI/UX Design
- Software Development

● AI-Driven Enterprise Information Orchestration Framework

Designed a system to integrate and manage enterprise data from multiple sources using AI-based orchestration. Helps improve data flow, automation, and decision-making in organizations.

Technologies: AI, Python, Web Technologies

Duration: Ongoing

● Mahas Boutique (Ongoing)

Developing an e-commerce boutique website with product catalog, wishlist, and stock management features for clothing collections.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

Duration: Ongoing
